|                   | Large underground factories are being built between                       |                                |

Large underground factories are being built between Loznica and Banja Koviljaca A series of workshops, over a distance of approximately six kilometers, are already completed. A large underground tunnel, the purpose of which is not known, is also ready.

25X1X a large underground tunnel, the purpose of which is not a factory for a secret weapon is being built. No details on the tunnel are available and peasants in nearby villages know nothing about it. The tunnel is closely guarded by non-commissioned officers.
